Agenda

- Start as a ninja XML student
 - Simple load save and change values
- How is the output beautifully formatted for young students?
- Change and read elements and attributes
- XPATH finally becoming a ninja?
- Search for elements and search by attribute

Agends

- Now it's time for the championship my student: master the XML namespaces and your training is finished
- That was all just.NET what a hoax! I wanted to see this in PowerShell (Bonus)
- Complex practical example

Demo

<https://github.com/AndreasNick/XML-with-PowerShell-PSConf2018>

PowerShell demo Sourcecode

Summary

- Easy to use for configuration files
- Use as a replacement for simple databases (XPath quere)
- Editing complex XML files with namespaces (unattended.xml)

Next Steps

- Build your own XML
- Now: 15 min break
- Grab a coffee
- Stay here to enjoy next presentation
- Change track and switch to another room
- Ask me questions or meet me in a breakout session room afterwards

Questions?
